One of the most important things when buying an awning or a canopy has to be the awning fabric. Not only will the awning give you protection from sun or rain, but as the awning fabric is the most eye-catching part of your awning, the fabric style can enhance the look of a garden, home or shop. SUN SHADE AWNINGS uses two types of fabrics.

**FERRARI**, France is a world leader in Architectural Fabrics. **FERRARI** Fabrics are made with the Patented “Precontraint Technology” due to which the fabric has excellent dimensional stability. FERRARI Fabrics are available in 9 Stripes & 29 Plain colours which can be thermally welded to create your own Designer Awnings.

**FERRARI** SOLTIS AIR fabrics are available in a range of beautiful colours.

SAULEDA, Spain makes 100% Dyed Acrylic Fabrics which are available in a wide range of eye catching colours & designs.

Actual colour shades might vary.
